

PLASTI 540 ASP – Induction heating

**PROFESSIONAL AUTOMATIC ROLL
LAMINATOR FOR SINGLE SIDE LAMINATION
INDUCTION HEATING**

PLASTI 540 ASP is top end laminating machine in MAMO range. Fully automatic laminator with BECKER vacuum pump. Extremely reliable user friendly software installed on a touch screen device. Induction heating system and pneumatic pressure grants fast reaching of target temperature and a stable heating during the process as well as high pressure for a perfect lamination result on any kind of printed material even at the maximum speed of 30mt per minute. Air expansion shaft releases film roll, and positions film roll more accurately, and also makes the loading and unloading of film roll easier. After automatic overlap and pneumatic cutting system that realizes laminated sheets separation sending them directly to the vibrating jogger (or on the optional stacker) for faster and more efficient trimming operations. Air compressor not included.

TECNICAL SPECIFICATIONS:

- ✓ Max Paper Size: 540×780mm
- ✓ Min Paper Size: 290×290mm
- ✓ Paper Thickness: 100-500gsm
- ✓ Working Speed: 30m/min
- ✓ Gross Power: 15 kW
- ✓ Overall Dimensions: 3300×1250×1600mm
- ✓ Weight: 1000kgs
