Changing the rounding knife

There are rounding knives available in 4 and 8 mm radius. If you want to make a different radius you have to change the knife. After removing the 2 pcs M6x16mm inner hexagonal screws with the hexagonal tool you can remove the knife and mount back the other knife in the same way. After changing the knife you have to set the paper guides.

Setting the paper guides

Cut some about 10 x 10 cm card accurately to rectangular shape. Loose the fixing screws of the paper guides move the guides away. Place the peace of card to the machine table, position it so that the knife should cut it well. (Press down the handle of the corner rounder to check the position of cutting) When you have find the proper position then set the paper guides to the sides of the paper and fix them with the screws.

Usage of the Paperfox S-3 corner rounder

You can achieve a perfect rounding only at rounding of accurately rectangular cutted paper or card. Put some cards into the machines, push down the handle. The Paperfox S-3 corner rounder pushes down the pile of paper automatically. If you are not satisfied with the result then set the paper guides again.
